PERMISSION FORM

Dear Parent / Guardian(s):

Imagine you are a young child and you awake one night to find your bedroom filling with smoke. Your house is on fire! What would you do?

To make sure your child has the skills that can potentially save his/her life, we will be teaching burn prevention and fire safety in class. A key element of this learning process will include a tour of the FIRE SAFETY HOUSE.

This mobile classroom is specially designed to teach children vital burn prevention and fire escape techniques through a fun, safe simulation of common hazards. The Fire Safety House is equipped with a kitchen, bedroom, and living room.

The House fills with a non-toxic water based smoke *. This realistic environment teaches children to "crawl-low" to safety. A heated door helps children choose the right exit. An escape ladder is used to exit from the bedroom.

If your child suffers from asthma, other respiratory conditions or allergies that may be irritated by the non-toxic smoke please indicate that below before allowing him/her to tour the house.

Note: All participants should wear pants/shorts and no heeled shoes at time of tour.

_____ My child, _____ may tour the Fire Safety House

_____ My child, _____ may not tour the Fire Safety House

_____ My child _____ has asthma, an allergy or respiratory condition that may be irritated by the nontoxic smoke and should not be in the House during that part of the program.
